

OPERATIONS MANUAL · MAN-01 · GFVX

GFVX Member Manual

The Member Handbook and every member SOP in one document

Applies to

Every GFVX pilot

This manual collects everything a GFVX member needs: the Member Handbook, then one step-by-step Standard Operating Procedure (SOP) for every tool on our website and in our Discord. Each SOP is also pinned in its Discord channel and can be downloaded on its own from galacticfrontierventures.com/resources.

How to use this manual

Start with the Member Handbook. After that, jump to the SOP for whatever you are trying to do. Every SOP has the same shape: what it is for, what you need, numbered steps, what success looks like, and what to do if something goes wrong.

Contents

Code	Document	Applies to
HB-01	Welcome to GFVX Everything you need to know to fly with Galactic Frontier Ventures	Members
SOP-M01	Joining GFVX Apply with your EVE character, link Discord, and get into the corp	New pilots applying to GFVX, and anyone helping a friend apply
SOP-M02	Using the Member Portal Sign in, link Discord, add your alts, and find every member tool	Every GFVX member

Code	Document	Applies to
SOP-M03	Selling to the Corp Buyback Turn ore, loot, and other goods into ISK at home, without a Jita trip	Every GFVX member with a linked, in-corp pilot
SOP-M04	Filling Wanted Board Requests See what the corp needs, pledge what you will bring, and get paid a bonus rate	Every GFVX member with a linked, in-corp pilot
SOP-M05	Asking the Frontier Find answers to EVE questions, and ask your own, named or anonymous	Anyone, including pilots who have not joined GFVX yet
SOP-M06	Using the Doctrine Library Find a GFVX fit, copy it into EVE, and buy what you need	Every GFVX pilot
SOP-M07	Getting Started With EVA Industry Our industry and market tool, built by GFVX Director zhyperion	Every GFVX member who builds, mines, trades, or runs planetary industry
SOP-M08	Finding and Joining Operations See what is flying, sign up, get reminders, and run your own event	Every GFVX pilot. Creating events: New Members and GFVX members.
SOP-M09	Sending Private Feedback to Leadership Ideas, concerns, and problems, straight to the right leaders in a private case	Recruits, New Members, and GFVX members
SOP-M10	Ping Roles and Pilot Resources Choose the notifications you want, and find the corp's curated EVE links	Recruits, New Members, and GFVX members
SOP-M11	Joining the Planetary Industry Program Take an assigned PI slot, run your colonies, deliver, and get paid	New Members and GFVX members (Recruits can join once they are New Members)
SOP-M12	Checking Your Membership and Recognition See your membership days, your role, and when you can be recognized as Pioneer or Vanguard	Every GFVX member

Something out of date?

EVE and our tools change. If anything in this manual does not match what you see, tell an officer or use the feedback panel in #help-desk, and we will fix it.

MAN-01 · Version 1.0 · Updated 2026-10-23 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

MEMBER HANDBOOK · HB-01 · GFVX

Welcome to GFVX

Everything you need to know to fly with Galactic Frontier Ventures

Our promise

Make ISK. Take risks. Explore farther. Build something worth belonging to. GFVX exists to make EVE easier and more fun to play together, never to become a second job.

Who We Are

Galactic Frontier Ventures (in-game ticker **GFVX**) is a human-led corporation for pilots who enjoy making money, learning systems, taking calculated risks, and doing meaningful things together. Our home system is **Zhilshinou** in Domain, Amarr high-security space. We are most active in the US Eastern evening window, and compatible pilots from anywhere are welcome. New, returning, and veteran pilots all belong here.

What we actually do

- **Industry and markets:** mining fleets, compression, manufacturing, a corp buyback that turns your ore and loot into ISK without a Jita trip, and a Wanted Board that pays a bonus for what the corp needs.
- **Exploration:** wormholes, relic and data sites, gas harvesting, and DED combat sites. We map wormhole chains together in Pathfinder.
- **Small-gang and selective PvP:** covert hunting, ESS runs, and organized risk-taking for those who want it.
- **Member-led events:** New Members and GFVX members can create an event; the corp helps make it happen.

What we are not

No alarm clocks. No mandatory fleets. No participation quotas. No mandatory voice. No drama. Real life always comes first: a busy month at work or with family is never something you need to explain or apologize for.

The Only House Rules

1. **Keep it respectful.** We win together and lose together; nobody gets torn down for a mistake.
2. **Be helpful.** Answer the new pilot's question. Share what you know.
3. **Be a positive presence.** If something is bothering you, use the feedback panel or talk to an officer. Problems get solved in private, not in public channels.

That's it

Three rules. Everything else in this handbook is here to help you, not to police you.

Your Path in GFVX

Your membership grows in three steps. Each one is a Discord role.

Membership	What it means	How you get there
Recruit	Accepted introductory member with access to member spaces and tools	Your application is approved (on the website or in Discord)
New Member	You have finished onboarding	Recruiting staff walk you through a short onboarding checklist in your private thread; leadership approves
GFVX	Full member: the normal role for everyone	Granted by leadership after a short introductory period (usually 1 to 2 weeks)

On top of that, two recognition ranks mark trust and belonging:

Recognition	What it means	How you get there
Pioneer	30 days in good standing	Awarded after a good-standing conversation: no quotas, no scores
Vanguard	90 days as a trusted regular	Awarded by the CEO

Pioneer and Vanguard are recognition, not authority. Leadership roles are separate, are service positions, and are offered to people who want them.

Activity: What We Ask

Voice is completely optional; plenty of members type. What we do ask is that you stay periodically active on Discord and in space. We are looking for people who actually enjoy playing EVE, not names on a roster.

If you go quiet for about 30 days, an officer will reach out as a friendly check-in, not a warning. Life happens: deployments, new babies, busy seasons. Tell us and your spot is safe.

Going away for a while?

Drop a note in Discord or message any officer. A heads-up is all it takes; your spot will be here.

Leadership

Role	Who	Come to them for
CEO	Grindberry	Corp direction, recruiting, big decisions, anything unresolved
Director	zhyperion	Strategy, economics, structures, EVA Industry
Manufacturing Divisional Officer	Nehebkau	Manufacturing, blueprints, production questions
Mining Divisional Officers	Devorisk, Anixilas	Mining fleets, ore, compression, mining questions
Wormhole Divisional Officer	David Hasselhoff sixseven	Wormholes, exploration, chain mapping

Officer titles describe trusted lanes, not bosses. Roles that are not listed are open; until they are filled, take those questions to the CEO.

Finding Your Way Around Discord

Area	What lives there
START HERE	#welcome, #rules-and-code, #how-to-join, #announcements, and #new-pilot-onboarding, where each applicant and new Recruit gets a private thread. Once you have been a member for a week, these onboarding channels hide themselves to keep your list tidy.
THE FRONTIER	#general, #screenshots-and-kills, and #memes
OPERATIONS	#corp-events: every scheduled event, with reminders and sign-up buttons
FLEET OPERATIONS	#fleet-pings for fleets forming now
INDUSTRIAL OPERATIONS	#wanted-board (what the corp needs, with bonus rates) and #planetary-operations (the corp PI program)
EXPLORATION & INTEL	#wormholes and #intel-alerts
CORPORATE SERVICES	#ore-buyback (your private buyback order threads), #pilot-resources (curated EVE links), #eva-industry, #corp-store, and #help-desk
VOICE COMMS	General and Fleet voice: optional, always open

Ping roles

Use the **Interest & Ping Roles** panel to pick the notifications you want: Fleet Ping, Industry Ping, Exploration Ping, PvP Ping, Hauling Ping, Market Ping, and Operation Python. You will hear about those activities and nothing else. Each time you use the panel it replaces your previous choice, so select every role you want to keep. Ask in #help-desk if you cannot find the panel.

Member Services

- **Corp buyback:** sell ore, ice, gas, planetary materials, loot, and other goods to the corp at home, currently at **90% of the Jita buy price**, with every item accepted. Get your quote on the website and staff finish the order with you in a private Discord thread. See **SOP-M03**.
- **Wanted Board:** when the corp needs something built or mined, it is posted on the Wanted Board with a bonus buyback rate while the request is open. See **SOP-M04**.
- **Free T1 ships and SRP:** the corp provides inexpensive Tech 1 ships and fittings for most corp events, and replaces doctrine T1 frigates, destroyers, and cruisers lost on corp fleets. Fancier ships fly at their owner's risk.
- **Home market:** our market in Zhilshinou is seeded with fittings at near cost, so restocking after a loss is a short trip.
- **Events:** mining fleets, exploration roams, combat sites, and whatever members dream up, all in #corp-events. Signing up is never attendance pressure. See **SOP-M08**.
- **Planetary Industry program:** members can volunteer for an assigned PI slot in #planetary-operations and are paid for deliveries. See **SOP-M11**.
- **Pilot resources:** leadership-curated EVE links and tools in #pilot-resources. See **SOP-M10**.
- **Suggestions and feedback:** the feedback panel in #help-desk opens a private case channel straight to leadership for ideas, concerns, or anything on your mind. Cases are private but not anonymous, and every one gets acknowledged. See **SOP-M09**.

Your Tools

Every tool below has its own step-by-step SOP, pinned in the matching Discord channel and downloadable from the website.

Tool	Where	SOP
Joining GFVX	galacticfrontierventures.com/join	SOP-M01
Member Portal (sign in, link Discord, link alts)	galacticfrontierventures.com/portal	SOP-M02
Corp Buyback	galacticfrontierventures.com/buyback and your Discord order thread	SOP-M03

Tool	Where	SOP
Wanted Board	galacticfrontierventures.com/wanted	SOP-M04
Ask the Frontier (new-player questions)	galacticfrontierventures.com/newbro	SOP-M05
Doctrine Library	galacticfrontierventures.com/doctrine	SOP-M06
EVA Industry	industry.e-v-a.eu	SOP-M07
This Week and events	#corp-events, Discord events, and galacticfrontierventures.com/this-week	SOP-M08
Private feedback to leadership	The feedback panel in #help-desk	SOP-M09
Ping roles and pilot resources	#pilot-resources	SOP-M10
Planetary Industry program	#planetary-operations	SOP-M11
Your membership and recognition	<code>/gfv ranks status</code> in any channel	SOP-M12

Getting Help

- **Quick question?** Ask in #help-desk or #general. Someone always knows.
- **Ship fitting, site advice, or industry planning?** Ask in #help-desk, #wormholes, or #eva-industry.
- **New to EVE?** Ask the Frontier at galacticfrontierventures.com/newbro answers the common questions, and you can ask your own.
- **Personal concern or something sensitive?** Message the CEO or any officer, or use the feedback panel in #help-desk. It stays private.

Welcome aboard

Undock with us, ask questions, and make yourself at home. The frontier is better with you in it.

HB-01 · Version 2.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M01 · GFVX

Joining GFVX

Apply with your EVE character, link Discord, and get into the corp

Applies to	New pilots applying to GFVX, and anyone helping a friend apply
Where	galacticfrontierventures.com/join, then the GFVX Discord
Time needed	About 5 minutes to apply; a recruiter follows up
You need	Your EVE Online login and a Discord account

What This Is For

The website application introduces your pilot to the GFVX recruitment team. Recruiting at GFVX is a human conversation: there is no skill-point minimum, no API or ESI check, and no mandatory voice. The website only checks that you own the EVE character you apply with.

Prefer to just talk?

You never have to use the website. Join the public Discord, introduce yourself, and talk with a recruiter. The website application simply gets your details to the team faster.

Before You Start

- ☐ You know which EVE character you want to bring into GFVX.
- ☐ You are logged in to the Discord account you want to use with the corp.
- ☐ *Optional:* you know where you heard about us and what you enjoy doing in EVE.

Step 1: Verify Your Pilot

1. Go to galacticfrontierventures.com/join.
2. Click **Sign in with EVE**.
3. Log in at the EVE Online page (that is CCP's own site, so we never see your password) and choose the character you are applying with.
4. Approve the request. It asks for **public character data only**.

You come back to the join page signed in as that character. To use a different character, click **Switch character / sign out**.

Step 2: Link Your Discord Account

1. Under **Discord account**, click **Link Discord account**.
2. Approve the request in Discord. It only shares your Discord identity.
3. Back on the page it shows *This EVE character is linked to your Discord account*.

This lets the corp give you your **Recruit** role in Discord automatically when your application is approved. You only need to do it once per character.

Step 3: Fill In the Application

Field	What to enter
How did you find GFVX?	Pick one. If you choose <i>Other</i> , say where (up to 100 characters).
What gameplay do you generally enjoy?	Tick at least one : Mining, Industry, Exploration, Wormholes, Missions / PvE, PvP, Trading, New pilot learning.
Anything else you want us to know?	Optional, up to 2,000 characters. What you want from a corp, your time zone, your experience.
GFVX community standards	Read the four standards and tick I have read and agree to these standards .

Then click **Submit application**.

Step 4: While You Wait

1. The page shows **Application received** with the time you submitted.
2. Join the GFVX Discord and say hello. You do not have to wait for approval to talk to us.
3. If your Discord is linked and you are in the server, a private thread named *web-app-yourcharacter* opens for you in **#new-pilot-onboarding** within a few minutes. Recruiters reach you there.

Step 5: After Approval

1. The join page shows **Welcome to the frontier**, and your private thread confirms the approval.
2. Within a few minutes you receive the **Recruit** role in Discord automatically (your Discord must be linked and you must be in the server).
3. Tell a recruiter your EVE character name in your thread so they can help with the in-game corporation invitation.
4. Recruiting staff walk you through a short onboarding checklist: the rules, your nickname, your ping roles, a quick chat or voice intro, and where to get help. When it is done, leadership approves you as a **New Member**.
5. Open the Member Portal (see **SOP-M02**) and read the Member Handbook.

What success looks like

Your application shows as approved, you have the Recruit role in Discord, your character has joined GFVX in game, and the Member Portal shows *GFVX membership confirmed*.

Applying in Discord Instead

You can also apply without the website:

1. In **#how-to-join**, press **Start Application** on the *Apply to Galactic Frontier Ventures* panel.
2. Fill in the form. Every field is required: your primary EVE character, your approximate total skill points, your time zone and usual play times, your experience and interests, and your corp history, goals, and agreement to the rules.
3. Submit. A private thread opens for you in **#new-pilot-onboarding**, where recruiting staff review your application, ask questions, and set up a quick interview if needed.

You can have one active application at a time.

Changing Your Mind

While your application is pending you can click **Withdraw application**. A withdrawn or rejected application is kept for 30 days and then deleted. You can submit a new one at any time.

If Something Goes Wrong

What you see	What to do
<i>Discord linking did not finish</i>	Click Link Discord account again. If it keeps failing, the character may already be linked to a different Discord account: ask a recruiter.
<i>This character already has an active application</i>	You already applied with this character. Watch for the recruiter's follow-up, or ask in Discord.
<i>Please complete the application and accept the current rules</i>	Pick a source, tick at least one interest, and tick the standards box.
<i>Sign-in expired</i> or the page asks you to sign in again	Click Sign in again . Website sign-ins last for your browser session.
No Recruit role a few minutes after approval	Make sure Discord is linked (Step 2) and that you have joined the server, then ask in your private thread.

What you see	What to do
<i>You already have an active application (Discord)</i>	Use the private thread you already have in #new-pilot-onboarding.

Good to Know

- **Privacy:** recruiters see only your answers and public character information. Approved applications are deleted 30 days after you leave GFVX.
- **Alts:** you only apply once. After you are in, link alts through the Member Portal (SOP-M02).
- **New to EVE?** The new-player hub at galacticfrontierventures.com/newbro has a first-week checklist and answers to common questions (SOP-M05).

Need Help?

Ask in your private application thread, or in **#help-desk**. Any recruiter or officer can help with your application.

SOP-M01 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M02 · GFVX

Using the Member Portal

Sign in, link Discord, add your alts, and find every member tool

Applies to	Every GFVX member
Where	galacticfrontierventures.com/portal
Time needed	About 3 minutes the first time; seconds after that
You need	Your EVE Online login and the Discord account you use in GFVX

What This Is For

The Member Portal is your home base on the website. It confirms your GFVX membership, connects your EVE characters to your Discord account, and links to every member tool. Linking once here is what unlocks the buyback, the Wanted Board, and the rest.

Why link Discord?

Your Discord account is how the website knows all your pilots belong to one person. As long as **any** linked pilot is in GFVX, your member tools keep working, even if you log in with an alt that is outside the corp.

Step 1: Sign In

1. Go to galacticfrontierventures.com/portal.
2. Click **Sign in with EVE** and log in at the EVE Online page. It asks for public character data only.
3. The portal shows *Welcome, [your pilot]*.

Step 2: Link Discord (once per pilot)

1. On the **Discord connection** card, click **Link Discord**.
2. Approve the request in Discord.
3. Back on the portal you see *Your Discord account is linked to this pilot*.

Step 3: Check Your Membership

Under your name, the portal shows one of these:

Message	What it means
<i>GFVX membership confirmed through your linked Discord account</i>	All set. Member tools are unlocked.
<i>Link your Discord account to verify corporation membership</i>	Do Step 2.
<i>No currently linked pilot is in GFVX</i>	None of your linked pilots are in corp. Link an in-corp pilot, or ask a recruiter.
<i>EVE could not verify every linked pilot right now</i>	EVE's servers did not answer in time. Refresh in a minute.

Step 4: Link Your Alts

1. In **Your Linked Pilots**, click **Switch pilot to link an alt**.
2. Sign in with EVE as the alt.
3. Click **Link Discord** and approve it with the **same** Discord account.
4. Repeat for each alt. Every linked pilot then appears in your list as *In GFVX* or *Outside GFVX*.

One Discord account per pilot

A pilot can only be linked to one Discord account. If a pilot is already linked to a different account, ask a recruiter to fix it rather than creating a second link.

Step 5: Use Your Tools

Card	What it opens	SOP
Discord connection	The GFVX Discord, once linked	This SOP
EVA Industry	Our industry and market tool	SOP-M07
Jita appraisal	The corp buyback	SOP-M03
Wanted board	What the corp needs built or mined	SOP-M04
Fits & skill paths	The doctrine library	SOP-M06
Application status	Your recruitment application, if this pilot has one	SOP-M01
Upcoming operations	Fleets from the Discord calendar	SOP-M08

Officers also see officer tools on the portal; those have their own officer SOPs.

What success looks like

The portal says *GFVX membership confirmed*, every pilot you fly is listed under Your Linked Pilots, and the member tools open without asking you to sign in again.

If Something Goes Wrong

What you see	What to do
<i>Discord linking did not finish</i>	Click Link Discord again. If it still fails, the pilot may be linked to another Discord account: ask a recruiter.
<i>This Discord account no longer has GFVX website access</i>	Website access was removed for this Discord account. Talk to the CEO.
<i>We could not verify your EVE sign-in</i>	Click Try signing in again .
A tool asks you to sign in again	Website sign-ins last for your browser session. Sign in again from the tool or the portal.

Good to Know

- Signing in asks EVE for **public character data only**. The website never sees your password, wallet, or assets.
- To sign out or swap characters, use **Switch pilot / sign out** at the top of the portal.
- Existing members never need to fill in a recruitment application to use the portal.

Need Help?

Ask in **#help-desk**, or message any officer.

SOP-M02 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M03 · GFVX

Selling to the Corp Buyback

Turn ore, loot, and other goods into ISK at home, without a Jita trip

Applies to	Every GFVX member with a linked, in-corp pilot
Where	galacticfrontierventures.com/buyback, then your private Discord order thread
Time needed	About 10 minutes, plus staff review
You need	Your EVE login, the Discord account you use in GFVX, and the items in a station hangar

What This Is For

The corp buyback buys almost anything you can sell, at home, at a fair policy rate based on the **Jita buy price** (currently 90% for most items). You paste your items into the website, get an instant quote, and create an order. Staff then finish the trade with you in a private Discord thread and pay you.

The short version

Copy items in EVE, paste them on the buyback page, check the quote, and create the order. In your private Discord thread, make a Private Item Exchange contract to our holding corporation, **Aurelia Asset Holdings**, then press **I Created the Contract**. An officer accepts it and you are paid.

Before You Start

- ☐ Your pilot is in GFVX.
- ☐ Your pilot is linked to your Discord account in the Member Portal (see **SOP-M02**). You only do this once.
- ☐ The items are in a station hangar you can reach, ideally at home in Zhilshinou.
- ☐ You do not already have a website order waiting to be opened in Discord. Only one can wait at a time; once it is open you can start another.

Step 1: Copy Your Items in EVE

1. Open the inventory window that holds the items (your item hangar or a container).
2. Switch the window to **List** view so every item shows on its own row with a quantity.
3. Click any item, press **Ctrl+A** to select everything, then **Ctrl+C** to copy.

You can also type items by hand, one per line, as `Item name x 100` or `100 x Item name`.

Step 2: Paste and Get Prices

1. Go to galacticfrontierventures.com/buyback.
2. Click in the **Items and quantities** box and press **Ctrl+V**.
3. Click **Get Jita prices**.
4. If the page asks you to sign in, click **Sign in with EVE**, then **Verify Discord**, then try again. Your sign-in lasts for the browser session.

Large first-time quotes can take a few seconds while Jita prices load.

Step 3: Check Your Quote

Each row of the quote shows:

Column	What it means
Jita buy / unit	The best visible Jita 4-4 buy order, cached up to five minutes
Policy	The rate that applies to that item and its category, for example <i>90% · Compressed ore</i> . A wanted bonus label means the item is on the Wanted Board and you are getting its bonus rate (see SOP-M04).
Buyback / unit	What the corp pays per item
Line estimate	Buyback per unit times your quantity

The **total** at the top adds up every priced line.

Lines marked for price review

If an item has no reliable Jita price, it shows a note instead of a price and is left out of the total. It is not valued at zero: it still goes to staff with your order, and they price it by hand.

If a row shows **Could not read these lines**, fix those lines in the paste box (each needs an item name and a quantity) and click **Get Jita prices** again.

Step 4: Create Your Order

1. Check the **Current / delivery location** field. It defaults to our home station, *Zhilshinou IX - Imperial Armaments Factory*. Change it if your items are somewhere else.
2. Click **Create buyback order**.
3. Wait on the page. The message changes to **Request received** while the bot opens your order. This usually takes under a minute. Do not submit it again.

4. When it says your order is open, click **Open your private Discord order**.

Step 5: Open Your Order Thread

Your private thread lives in **#ore-buyback** and is named after your order, for example *bb-000123-yourcharacter*. Only you and buyback staff can see it. The bot posts:

- your order card with the order number (for example **GFV-BB-000123**) and status,
- the **website quote snapshot**: every line with its quantity, category, and rate (Wanted Board lines are marked  **Wanted board bonus**),
- the full item list as a text file, and
- the **contract instructions**, if your order is ready.

If any item could not be priced, the order starts in **Pricing review**. Wait: staff price those items and post the final payout in the thread before you contract anything.

Step 6: Create the Contract in EVE

Follow the instructions in your thread exactly. They look like this: *Create a 3-day Private Item Exchange contract to Aurelia Asset Holdings for X ISK*.

1. In EVE, open **Contracts** and choose **Create Contract**.
2. Contract type: **Item Exchange**. Availability: **Private**. In the name box type **Aurelia Asset Holdings** and pick the corporation.
3. Add every item from your order.
4. Set **I will receive** to the exact ISK amount from your thread. The website quote already includes the buyback rate, so do not discount it again.
5. Expiration: **3 days**.
6. Description: copy it from your thread. It is your order number and character, for example `GFV-BB-000123 | Your Character`.
7. Create the contract.

Contract to Aurelia Asset Holdings only

The only correct recipient is the corporation **Aurelia Asset Holdings**, our holding company. Never contract buyback items to **My Corporation**, to **GFVX**, or to any individual character, including the old buyback character. Contracts to anyone else cannot be processed.

Why a holding corporation?

Several officers have characters in Aurelia Asset Holdings, so any of them can accept your contract and pay you. Orders no longer wait for one person to be online.

Step 7: Tell the Bot You Contracted

1. In your order thread, press **I Created the Contract**.
2. In **Type the contract recipient**, type `Aurelia Asset Holdings` (capitals do not matter).
3. Optionally paste the EVE contract ID.
4. Submit. The order moves to **Contract created** and staff are notified.

Step 8: Get Paid

1. An officer with a character in Aurelia Asset Holdings checks your contract in EVE and accepts it. Accepting an Item Exchange pays you the agreed ISK in game.
2. The order moves to **Accepted**, then **Paid**, then **Closed**. The thread is locked once the order is closed, and archived a week later.

What success looks like

Your order shows **PAID** then **CLOSED**, the agreed ISK is in your wallet, and the items are gone from your hangar. Nothing else to do.

Order Statuses

Status	What it means	What you do
Ready to contract	The payout is final	Create the contract (Step 6), then press I Created the Contract
Pricing review	Staff need to price something or give a second approval	Wait for the payout to appear in your thread
Needs info	Staff asked you a question	Answer in your thread
Contract created	You reported your contract	Wait for staff to accept it
Accepted	Staff accepted your contract in EVE	Nothing; payment is recorded next
Paid, then Closed	Done	Nothing

Status	What it means	What you do
Rejected or Canceled	Ended without payment	Read the reason in your thread; ask staff if unsure

Until staff accept your contract, you can cancel with the **Cancel Order** button in your thread. It cancels immediately.

If Something Goes Wrong

What you see	What to do
<i>Verify your linked Discord account to appraise items</i>	Click Verify Discord on the page, approve it in Discord, then click Get Jita prices again.
<i>Your EVE sign-in has expired</i>	Click Sign in with EVE , then try again.
<i>An in-corp GFVX pilot is required</i>	The pilot you signed in with, or one of your linked alts, must be in GFVX. Link an in-corp pilot in the Member Portal (SOP-M02).
<i>The buyback bot is offline</i>	The Discord bot is restarting or down. Try again in a few minutes.
<i>You already have an order request waiting for Discord</i>	Your last order is still being opened. Wait for it, then create the next one.
<i>A wanted-board request changed while you were quoting</i>	Someone else's order took part of a Wanted Board request. Click Get Jita prices again for a fresh quote.
<i>This paste is too large</i>	Split your items into smaller pastes (up to 200 different items each) and sell them as separate orders.
<i>The order stays on Request received for more than a few minutes</i>	Do not resubmit. Ask in #help-desk with the time you submitted.
<i>Recipient must be Aurelia Asset Holdings. Do not contract to GFVX, My Corporation, or a character.</i>	Type Aurelia Asset Holdings in the I Created the Contract form. If your EVE contract went to anyone else, delete it in EVE and make a new one to Aurelia Asset Holdings.
<i>Only the order seller can confirm this contract</i>	Press the button with the Discord account that created the order.

Good to Know

- The quote is an estimate using the policy and Jita prices at the moment you clicked. If anything changes, staff confirm the final amount in your thread before you contract.

- Quotes use top-of-book prices, so very large quantities may not all sell at that price in Jita. Staff take that into account.
- Taxes, hauling, and contract fees are not included in the quote.
- Raw and compressed ore are different items with their own prices.
- Very large payouts (over 250 million ISK) need a second staff approval before they are ready to contract, so they can take a little longer.
- The website is the easiest way to sell. You can also start from Discord; see *Starting an Order in Discord* below.

Starting an Order in Discord

If you prefer, start from the **GFVX Materials Buyback** panel in #ore-buyback:

1. Make an appraisal of your items on **Janice** (janice.e-351.com) for Jita 4-4 and copy its link.
2. Press **Start Official Buyback** and fill in your EVE seller character, your items and quantities, your current or delivery location, and the Janice link on the first line of the last box (anything after it becomes a note).
3. Ore, ice, gas, and planetary materials are priced automatically at the policy rate. Anything else waits for staff to price it.
4. Your private order thread opens, and everything from Step 5 onward is the same.

Each Janice link can be used for one order only.

Need Help?

For a specific order, ask in that order's private thread so staff have the details. For anything else, ask in **#help-desk**.

SOP-M03 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M04 · GFVX

Filling Wanted Board Requests

See what the corp needs, pledge what you will bring, and get paid a bonus rate

Applies to	Every GFVX member with a linked, in-corp pilot
Where	galacticfrontierventures.com/wanted, the buyback page, and #wanted-board in Discord (read-only)
Time needed	A minute to pledge; delivery works like a normal buyback
You need	A linked pilot (SOP-M02) and the requested items

What This Is For

When the corp needs something built or mined, an officer posts it on the **Wanted Board** with a **bonus buyback rate**. While the request is open, that item is paid at the bonus rate when you sell it through the normal corp buyback. New requests are announced in **#wanted-board** on Discord.

The short version

Find a request, pledge how much you will bring, then sell it through the buyback (SOP-M03). Lines that fit inside what the request still needs get the bonus rate automatically.

Step 1: Open the Board

1. Go to galacticfrontierventures.com/wanted, or click **Open the wanted board** on the Member Portal.
2. If asked, click **Sign in with EVE**. The board is for current GFVX members only.

Step 2: Read a Request

Each request card shows:

Part of the card	What it means
MINE or BUILD	Whether the corp wants it mined or manufactured
Bonus rate (for example <i>95% of Jita buy</i>)	What the corp pays for this item while the request is open
Needed by	The deadline, if there is one. The bonus stops after this date.

Part of the card	What it means
Needed	The total quantity the corp wants
Delivered	Quantity on buyback orders that staff have already paid
On the way	Quantity on buyback orders that are open but not yet paid
Still open	What is left for someone to bring. Only this amount can get the bonus.
Pledged	Who has said they will bring some, and how much

Step 3: Pledge What You Will Bring

1. In **I'll bring**, type a quantity.
2. Click **Pledge**. Your name and amount appear in the pledge list so other pilots do not double up.
3. To change it, type a new amount and click **Update pledge**. To cancel it, click **Withdraw**.

A pledge is a plan, not a contract. Nobody is penalized for changing or withdrawing one.

Step 4: Deliver Through the Buyback

1. Click **Sell through buyback** on the card, or go to galacticfrontierventures.com/buyback.
2. Paste your items and click **Get Jita prices**, exactly as in **SOP-M03**.
3. Check the line for the requested item:
 - It shows the bonus rate and a **wanted bonus** label when your quantity fits inside **Still open**.
 - If you pasted more than is still open, that line shows the **normal** rate and a note such as *Wanted board needs only 3,200*. Change the quantity to that amount and get prices again to receive the bonus. Sell the rest in a later order.
4. Create the order and finish it in your private Discord thread as usual. Your order thread marks the line with **Wanted board bonus**.

Step 5: Watch It Complete

1. Right after you create the order, your quantity moves to **On the way**.
2. When staff pay the order, it moves to **Delivered**.
3. When deliveries reach the target, the request is marked **Filled**, the bonus stops, and a notice is posted in #wanted-board.

What success looks like

Your order thread shows the Wanted board bonus line, you are paid at the bonus rate, and the request's Delivered amount includes your quantity.

If Something Goes Wrong

What you see	What to do
<i>Link this pilot to your Discord account in the member portal first</i>	Link the pilot in the Member Portal (SOP-M02), then reload the board.
<i>The wanted board is for current GFVX members</i>	None of your linked pilots are in corp. Link an in-corp pilot.
<i>Your EVE sign-in has expired</i>	Click Sign in with EVE and reload.
<i>This request is no longer open</i>	It was filled or closed while you were looking. Check the board for other requests.
<i>Pledge between 1 and ...</i>	Pledge a whole number no larger than the request's total.
<i>A wanted-board request changed while you were quoting (on the buyback page)</i>	Someone else's order took some of the open amount. Get Jita prices again.
An order you created is canceled	Its quantity returns to Still open so someone else can fill it.

Good to Know

- Pledging does not reserve anything. Only a created buyback order holds quantity, and the first orders created get the bonus.
- An order that is not paid within 14 days stops holding quantity, so the board cannot get stuck.
- Filled and closed requests stay visible under **Recently filled or closed** for 14 days.
- You can still sell any item through the normal buyback at the normal rate; the Wanted Board only adds a bonus.

Need Help?

Ask in **#help-desk**, or message the officer who posted the request (shown on the card). **#wanted-board** only carries announcements.

SOP-M04 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M05 · GFVX

Asking the Frontier

Find answers to EVE questions, and ask your own, named or anonymous

Applies to	Anyone, including pilots who have not joined GFVX yet
Where	galacticfrontierventures.com/newbro
Time needed	A minute to search; officers answer as soon as they can
You need	Nothing to read answers. An EVE login to ask a question.

What This Is For

Ask the Frontier is our public question board for new and returning pilots. GFVX officers answer questions about EVE and about the corp, and every answer gets its own page so the next pilot can find it. The same page also has a first-week checklist and quick answers to common questions.

Step 1: Look for an Existing Answer

1. Go to galacticfrontierventures.com/newbro and scroll to **Ask the Frontier**.
2. Type in **Search answers** (for example *skills*, *wormholes*, or *ISK*), or pick a **Topic**: Getting started, Skills, Ships & fitting, Making ISK, Industry & mining, Exploration & wormholes, PvP, or Joining GFVX.
3. Click any question under **Answered questions** to open its full answer.

Questions that are approved but not answered yet are listed under **Waiting for an answer**.

Step 2: Sign In to Ask

1. Click **Sign in with EVE to ask**.
2. Log in at the EVE Online page. It uses public sign-in only, with no extra permissions. Signing in keeps the board free of spam; you can still post anonymously.

Step 3: Ask Your Question

1. Type your question in **Your question** (10 to 1,200 characters). One question per post works best.
2. Pick the closest **Topic**.
3. Under **Show my question as**, choose **Anonymous Capsuleer** or your pilot name.

4. Click **Send question**.

You can ask **3 questions per day**. The form shows how many you have left.

Step 4: Follow Your Question

Your questions are listed under **Your questions** with their status:

Status	What it means
Waiting for review	An officer has not looked at it yet. It is not public.
Approved, awaiting an answer	It is public under <i>Waiting for an answer</i> , and the right officer has been notified.
Answered	The answer is published. Click the question to read it on its own page.
Not published	The officer decided not to publish it (for example a duplicate, or something better asked privately).

What success looks like

Your question appears under Answered questions with its own page, credited to the officer who answered it, and you can share the link with anyone.

If Something Goes Wrong

What you see	What to do
The Send question button is greyed out	Write at least 10 characters, and check you have questions left today.
<i>You can ask 3 questions per day</i>	Try again tomorrow, or ask in Discord.
<i>The board is receiving a lot of questions right now</i>	Many questions arrived in the last hour. Try again later, or ask in Discord.
<i>The question board is temporarily unavailable</i>	Ask in our Discord instead; someone will help.

Good to Know

- **Privacy:** if you post as Anonymous Capsuleer, your name is never shown. Officers can still see which pilot asked, to keep the board free of abuse.
- Nothing you ask is public until an officer approves it.

- For urgent help in game, Discord is faster: post in **#help-desk**.

Need Help?

Ask in **#help-desk** on the GFVX Discord, or message any officer.

SOP-M05 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M06 · GFVX

Using the Doctrine Library

Find a GFVX fit, copy it into EVE, and buy what you need

Applies to	Every GFVX pilot
Where	galacticfrontierventures.com/doctrine and the EVE Fitting window
Time needed	About 2 minutes per fit
You need	EVE running, and ISK for the hull and modules

What This Is For

The Doctrine Library holds ready-to-copy GFVX fits for four paths: **Frontier Line**, **Mission Ladder**, **Exploration**, and **Veteran T2**. Every fit is in EFT text format, which EVE can import directly, so you never have to build a fit module by module.

Flying for SRP?

The library fits are reference fits. For ship replacement (SRP), fly the corporation fitting published by leadership for that fleet, and follow the fleet commander's instructions.

Step 1: Find a Fit

1. Go to galacticfrontierventures.com/doctrine.
2. Pick a path tab: **All**, **Frontier Line**, **Mission Ladder**, **Exploration**, or **Veteran T2**. Each tab shows a short note on when to fly it.
3. Or type in **Find a hull, role, or activity** (for example *tackle*, *Omen*, or *gas*).

Each card shows the path, whether it works on an **Alpha** or **Omega** clone, the hull, its role, and a short note.

Step 2: Copy the Fit

1. Click **Review EFT fitting** if you want to see every module first.
2. Click **Copy EFT fit**. A message confirms it was copied.

If your browser blocks copying, open **Review EFT fitting**, select the whole text, and copy it yourself (Ctrl+C).

Step 3: Import It Into EVE

1. In EVE, open the **Fitting** window, then open your **saved fittings** (Fitting Management).
2. Choose **Import from Clipboard**.
3. The fit appears in your saved fittings with its name.

Step 4: Buy and Fit the Ship

1. Get the hull: from the home market in Zhilshinou, GFVX stock, or the Amarr market.
2. With the hull active, open the saved fit and use EVE's option to **buy the missing items**, then **fit the ship**.
3. Check that every module is online and that the fit shows no warnings.

What success looks like

The fit is saved in EVE under its GFVX name, your ship matches it module for module, and nothing is offline.

If Something Goes Wrong

What you see	What to do
<i>Your browser blocked clipboard access</i>	Open Review EFT fitting , select the text, and copy it manually.
EVE says it cannot import the fit	Copy the whole fit, including the first line in square brackets, and import again.
You cannot fit a module	You are missing a skill. Check the module in EVE to see which skill, or use the full guide's skill plans.
No fit matches your search	Try a broader word, or open the full guide for alternate hulls.

Good to Know

- **Open full guide** opens the complete doctrine guide (PDF) with alternates, every mission step, skill plans, T2 requirements, and the SRP rules.
- **Check markets in EVA** opens EVA Industry's market search to compare prices (see SOP-M07).
- Doctrines change as the corp grows. Re-copy a fit if leadership announces an update.

Need Help?

Ask in **#help-desk** or **#general**. Fleet commanders and officers are happy to check a fit before you undock.

SOP-M06 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M07 · GFVX

Getting Started With EVA Industry

Our industry and market tool, built by GFVX Director zhyperion

Applies to	Every GFVX member who builds, mines, trades, or runs planetary industry
Where	industry.e-v-a.eu, and #eva-industry in Discord for access and help
Time needed	About 5 minutes, plus a short wait for account approval
You need	Your EVE Online login

What This Is For

EVA Industry is the corp's tool for industry and markets. It replaced the blueprint calculator and the Black Ledger that used to be on the GFVX website. Corp tools such as the buyback, the Wanted Board, doctrines, and recruitment stay on galacticfrontierventures.com.

If you used to use...	It is now in EVA as...	What it does
Blueprint calculator	Calculator	Profit, ROI, and ISK per hour for every blueprint, with build-or-buy for each part, your real skills, and your own facilities
Black Ledger	Home, Assets, Jobs, Orders, and PI timers	Wallets, industry jobs, market orders, planetary colonies, and assets for all of your characters in one dashboard
Regional markets	Market search and trading	Prices and order books for every hub and region, station trading, and hub arbitrage with hauling included

Step 1: Log In

1. Go to industry.e-v-a.eu (or click **Open EVA Industry** on the Member Portal).
2. Log in with EVE Online. You log in at CCP's own page, so EVA never sees your password.

Step 2: Wait for Approval

New accounts are approved by hand. If it is taking a while, ask in **#eva-industry** on Discord.

Step 3: Connect Your Characters

1. Open the **Account** page.
2. Connect each character you want EVA to work with.
3. Choose what EVA may read for each one. **Builder** is enough to start; you can add more later.

You can disconnect a character at any time from the same page.

What success looks like

Your characters appear on the EVA Home page with their wallets and jobs, and the Calculator shows profits using your own skills.

If Something Goes Wrong

Problem	What to do
Your account is still waiting for approval	Post in #eva-industry with your main character's name.
A character's data looks out of date	EVE updates some data on a timer. Check again later, or reconnect the character on the Account page.
You want EVA to stop reading a character	Disconnect it on the Account page.

Good to Know

- EVA Industry is built and hosted by Director **zhyperion**. Questions and feature ideas go to #eva-industry.
- Selling goods to the corp still happens through the GFVX buyback (SOP-M03), not through EVA.

Need Help?

Ask in **#eva-industry** on Discord.

SOP-M07 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M08 · GFVX

Finding and Joining Operations

See what is flying, sign up, get reminders, and run your own event

Applies to	Every GFVX pilot. Creating events: New Members and GFVX members.
Where	#corp-events and Discord Events, galacticfrontierventures.com/this-week, and the Member Portal
Time needed	A minute to sign up; about 3 minutes to create an event
You need	The GFVX Discord

What This Is For

GFVX operations (mining fleets, wormhole runs, missions, PvP roams, and member-led events) all show up in **#corp-events** on Discord. Public ones also appear on the website. Every fleet is an invitation, never an attendance requirement.

There are two kinds of event, and both appear in #corp-events:

Kind	What it looks like	How you sign up
Discord event	A card with the event title linking to Discord's own event page	Click the title, then Interested in Discord
Corp event	A card titled <i>EVT-000123 — Title</i> with buttons underneath	Press Interested or Going on the card

Step 1: See What Is Coming Up

- **#corp-events** shows every scheduled event. Cards update on their own, and ended events move to the archive.
- Type `/gfv events list` in any channel for a private list of upcoming corp events.
- Open **Events** at the top of Discord's channel list to see every Discord event.
- galacticfrontierventures.com/this-week and the Member Portal show the public operations. Website times are in **US Eastern**; Discord shows your local time.

Step 2: Sign Up

For a Discord event: click the event title on its card (or open it from Discord's Events list) and click **Interested**. Discord reminds you before it starts, in your local time.

For a corp event (EVT card): press a button on the card:

Button	What it means
Interested	You might come
Going	You plan to come. If the event has a size limit and it is full, Going is refused.
Attended	You were there. This only works after the event has started.
Withdraw	You are no longer coming

Signing up for a corp event gets you two reminders in #corp-events: one about **24 hours** before and one about **1 hour** before. Only people marked Interested or Going are mentioned.

Step 3: Get Pinged for What You Like

Pick your ping roles on the **Interest & Ping Roles** panel (see the Member Handbook). New corp events ping the matching role once when they are created: Mining and Industry events ping **Industry Ping**, PvP events ping **PvP Ping**, and Exploration and Wormhole events ping **Exploration Ping**.

Step 4: Show Up and Fly

1. Check the event card and **#fleet-pings** for form-up location, fits, and any changes.
2. For doctrine ships see **SOP-M06**. For most corp fleets the corp provides cheap T1 ships and fits.
3. Join the fleet in game when the fleet commander opens it. Voice is optional.

What success looks like

You are signed up, you got your reminder, and you are in fleet with the fit the FC asked for.

Running Your Own Event

New Members and GFVX members can create corp events.

1. In any channel, type `/gfv events create` and fill in:

Option	What to enter
title	Up to 100 characters
start	Your local start time as YYYY-MM-DD HH:MM , for example 2026-11-02 20:00

Option	What to enter
timezone	Your time zone, for example <code>America/New_York</code> , <code>America/Chicago</code> , <code>Europe/London</code> , or <code>UTC</code>
category	Mining, Industry, PvE, PvP, Exploration, Wormhole, Missions, Training, Social, or Other
duration	For example <code>2 hours</code>
description	What you are doing and where to form up (up to 1,000 characters)
new_player_friendly	true or false
requirements	<i>Optional:</i> ships, skills, or fits needed
max_participants	<i>Optional:</i> a limit from 1 to 500

- The bot posts your event card in #corp-events, pings the matching role, and confirms the event number.
- To cancel or mark it complete later, use `/gfv events manage event_id:EVT-000123 action:Cancel` (or `Complete`). Only you or an event manager can do this.

Want your event on the website?

Corp events made with `/gfv` stay in Discord. To also publish an event on galacticfrontierventures.com, create it as a **Discord event** and put `#website` (exactly that, in lower case, as its own word) anywhere in the description. The tag is removed from the published text. Remove it to unpublish.

If Something Goes Wrong

Problem	What to do
<i>This event has reached its participant limit</i>	The event is full. Mark Interested in case a spot opens.
<i>Attendance can be marked only after the event starts</i>	Press Attended once the event is under way.
<i>New Member or GFVX membership is required to create a GFVX event.</i>	Recruits can join events but not create them yet. Ask an officer to post it for you.
<i>This event is cancelled, so sign-ups are closed. (or completed, or archived)</i>	The event is over or called off. For attendance corrections, ask the organizer.

Problem	What to do
Your event was refused because of the date, time, or time zone	The bot tells you exactly what was wrong. Use YYYY-MM-DD HH:MM , a real time zone name such as <code>America/New_York</code> , and a start time in the future.
You did not get a reminder	For corp events, make sure you pressed Interested or Going. For Discord events, click Interested in Discord and check your Discord notifications.
<i>No scheduled operations are currently posted (website)</i>	Check #corp-events and #fleet-pings for spontaneous fleets.

Good to Know

- Missing a fleet is never a problem. Real life comes first.
- Past operations stay on /this-week under **Recent Operations** with their original brief.
- Pressing a button on a corp event counts as activity, which helps leadership see who is around.

Need Help?

Ask in **#help-desk** or **#general**, or message the event's organizer.

SOP-M08 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M09 · GFVX

Sending Private Feedback to Leadership

Ideas, concerns, and problems, straight to the right leaders in a private case

Applies to	Recruits, New Members, and GFVX members
Where	The Suggestions & Feedback panel pinned in #help-desk
Time needed	About 3 minutes
You need	The GFVX Discord

What This Is For

The feedback panel opens a **private case** between you and the leaders who can act on it. Use it for suggestions, general feedback, a concern or problem, ideas for the Discord or bot, or an activity or event idea. Cases are **private but not anonymous**: the leaders handling it can see who you are, and nobody else can.

Step 1: Open the Panel

1. Go to **#help-desk** and find the pinned **GFVX Suggestions & Feedback** panel.
2. Press **Submit Private Feedback**.

Step 2: Pick a Category

Choose the closest one: **Suggestion / Idea, General Feedback, Concern / Problem, Discord / Bot Improvement, or Activity / Event Idea**.

Step 3: Say Whether It Is About an Officer

Choose from **Is this about a specific officer?** Pick **NONE** if it is not about a particular person.

Raising a concern about an officer

If you name an officer, the case goes to the **CEO only**. If it is about the CEO, it goes to the CEO and the Personnel Officer. Nobody else sees it.

Step 4: Write It

1. **Short subject:** up to 100 characters.
2. **Details:** up to 1,800 characters. What happened or what you suggest, and what you would like to see.
3. Submit. The bot replies *Your private feedback workspace is ready* with a link.

Step 5: Follow Your Case

1. Your private case channel opens (named like *feedback-fb-1a2b3c*). Only you and the leaders it was routed to can see it, and the CEO is notified.
2. Add more detail there at any time; leadership replies there too.
3. When leadership changes the status, you get a message in the channel:

Status	What it means
New	Just opened
Acknowledged	Leadership has seen it
Under review	Being looked into
Planned	Leadership plans to act on it
Declined	Not going ahead; the reason is posted in the case
Resolved	Done
Archived	Closed and saved; you can no longer post in it

To check a case at any time, type `/gfv feedback status case_id:FB-1A2B3C` .

What success looks like

Your case has its own private channel, the right leaders have acknowledged it, and you can see its status change as they work on it.

If Something Goes Wrong

What you see	What to do
<i>A matching active feedback case already exists: FB-... Add to that case instead of opening a new one.</i>	You already have an open case with that subject. Post in that case channel.

What you see	What to do
<i>GFVX feedback is available to current Recruits, New Members, and GFVX members.</i>	You need a member role. Ask in #help-desk.
<i>Feedback case FB-... was not found, or you are not allowed to see it.</i>	Check the case ID (for example FB-1A2B3C).

Good to Know

- Every case gets acknowledged. No idea is too small.
- For quick questions that are not private, #help-desk or #general is faster.

Need Help?

Message the CEO or any officer.

SOP-M09 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M10 · GFVX

Ping Roles and Pilot Resources

Choose the notifications you want, and find the corp's curated EVE links

Applies to	Recruits, New Members, and GFVX members
Where	#pilot-resources (ping roles and resource library), #how-to-join (ping roles for newcomers), #eva-industry
Time needed	About 2 minutes
You need	The GFVX Discord

What This Is For

Ping roles decide which activity announcements reach you. **Pilot resources** is a leadership-curated list of the EVE websites and tools our pilots actually use.

Choose Your Ping Roles

1. Open **#pilot-resources** and find the pinned **GFVX Interest & Ping Roles** panel. (New pilots also see a copy in #how-to-join.)
2. Open **Select all ping roles you want to receive** and tick every role you want:

Role	You hear about
Fleet Ping ✈️	Fleets forming
Industry Ping 🏭	Mining and industry operations
Exploration Ping 🗺️	Exploration and wormhole operations
PvP Ping ⚔️	PvP roams and fights
Hauling Ping 🚚	Hauling help wanted
Market Ping 📈	Market and buyback notices
Operation Python 🐍	The corp's Operation Python project

3. Confirm. The bot replies *Your GFVX ping roles have been updated.*

Your choice replaces the old one

Each time you use the panel, it replaces your whole selection. Tick **every** role you want to keep. Choosing none removes all seven.

Browse the Pilot Resources

- Open the **GFVX Pilot Resource Library** panel in **#pilot-resources**, or type `/gfv resources list` in any channel for a private copy.
- Links are grouped by topic: New Pilot, Mining, Industry, Planetary Industry, Exploration / Wormholes, PvE / Missions, PvP, Hauling / Markets, and Fittings / Tools.
- It includes EVA Industry, EVE University, Janice, Fuzzwork, Adam4EVE, Anoik.is, zKillboard, DOTLAN, Pyfa, and more.

EVA Industry in Discord

Type `/eva` in any channel for a private card with links to EVA Industry, its help, and what is new. The full guide is **SOP-M07**.

What success looks like

You only get pinged for activities you care about, and you know where to find the corp's trusted tools.

If Something Goes Wrong

What you see	What to do
<i>This selector is available to Recruits, New Members, and GFVX members.</i>	You need a member role first. Ask in #help-desk.
<i>These roles were unavailable and were left unchanged: ...</i>	A role is missing on the server. Tell an officer.
<i>Only current Recruits, New Members, and GFVX members may view the pilot resource library.</i>	You need a member role first.
You stopped seeing #how-to-join	Normal: after a week as a member, the onboarding channels hide themselves. Use #pilot-resources.

Need Help?

Ask in **#help-desk**. To suggest a link for the library, use the feedback panel (SOP-M09).

SOP-M10 · Version 1.0 · Updated 2026-10-22 · Audience: Members. Galactic Frontier Ventures [GFVX]. If anything here no longer matches what you see, tell an officer so we can fix it.

STANDARD OPERATING PROCEDURE · SOP-M11 · GFVX

Joining the Planetary Industry Program

Take an assigned PI slot, run your colonies, deliver, and get paid

Applies to	New Members and GFVX members (Recruits can join once they are New Members)
Where	The GFVX Planetary Operations panel in #planetary-operations, plus bot DMs
Time needed	A few minutes to sign up; then your normal PI routine each cycle
You need	Planetary Interaction skills for your package, and colonies you can set up

What This Is For

The corp PI program gives you a **slot**: a planned package of five colonies that produces something the corp needs. You deliver your output to the corp each **cycle**, and the Planetary Interactions Officer pays you at the **PI rate** (default 90% of the Jita buy price). Extra PI you produce outside the program can still be sold through the normal buyback (SOP-M03).

Step 1: Volunteer

1. In #planetary-operations, press **Volunteer for PI** on the **GFVX Planetary Operations** panel.
2. Choose a package from **Choose a PI package**. Each option shows where it is and how many slots are open:

Package	Where	Slots
RCM Feed – Synthetic Synapses (self-contained)	High-sec	15
OMA Feed – Condensates + Bacteria (self-contained)	High-sec	10
A – Robotics + Guidance	Null-sec (Providence)	5
B – Robotics + TMC	Null-sec (Providence)	10
C – Guidance + TMC	Null-sec (Providence)	10

Providence packages are only open while leadership has approved operating there.

3. One of three things happens:
 - **Assigned:** You are assigned to PI slot N. Your five colonies are shown and sent to you by DM.
 - **Waiting list:** the package is full. You are assigned automatically when a slot opens.
 - **Recorded:** leadership confirms your assignment shortly.

Step 2: Build and Report Progress

1. Press **My PI Status** any time to see your slot, package, and five colonies.
2. As you go, press **Update Milestone** and choose **Colonies Built**, **Producing**, or **Paused / Blocked**.

Step 3: Deliver Each Cycle

1. Put your assigned output in the **Planetary Operations hangar** at **Zhilshinou IX - Imperial Armaments Factory**.
2. Press **Report Delivery** and fill in:
 - **Delivered materials and quantities**
 - **Delivery location / hangar**
 - **Notes** (type **NONE** if none)
3. The bot gives you a delivery number (for example *PI-DLV-000012*).
4. The Planetary Interactions Officer checks the hangar and the Jita buy price, then **confirms** your delivery and pays you. You get a DM when it is confirmed (with the payout) or if it is rejected (with the reason; you can report again).

You get a DM reminder about 48 hours before a cycle's deadline if you have not delivered yet, and another if it becomes overdue.

Step 4: If Something Blocks You

Press **Report a Problem**, give a short summary and what happened. The Planetary Interactions Officer gets it, and you get a DM when it is resolved.

What success looks like

Your slot shows Producing, you deliver before each deadline, and each delivery is confirmed and paid.

If Something Goes Wrong

What you see	What to do
<i>The GFVX PI program is available to current New Members and GFVX members.</i>	Recruits join once they become New Members.
<i>PI sign-ups are currently closed.</i>	Check back later or ask in #planetary-operations.
<i>You are already assigned to PI slot N.</i>	Use My PI Status .

What you see	What to do
<i>No PI delivery cycle is open.</i>	Wait for the next cycle; ask the Planetary Interactions Officer if unsure.
<i>You are not on this cycle's frozen roster; your assignment begins next cycle.</i>	You joined after the cycle opened. Deliver next cycle.
<i>You already reported delivery X for cycle C.</i>	Your delivery is recorded; wait for confirmation.

Good to Know

- Each cycle's roster is fixed when the cycle opens.
- The program is reviewed after two complete delivery cycles.
- Leaving the program or changing packages: talk to the Planetary Interactions Officer first.

Need Help?

Ask in **#planetary-operations**, or message the Planetary Interactions Officer (the CEO while that role is open).

STANDARD OPERATING PROCEDURE · SOP-M12 · GFVX

Checking Your Membership and Recognition

See your membership days, your role, and when you can be recognized as Pioneer or Vanguard

Applies to	Every GFVX member
Where	Any Discord channel
Time needed	A few seconds
You need	The GFVX Discord

What This Is For

Your Discord roles show where you are in GFVX. Membership roles (**Recruit**, **New Member**, **GFVX**) unlock access. Recognition ranks (**Pioneer**, **Vanguard**) mark time and trust; they never change access. The Member Handbook explains each one.

Check Your Status

1. In any channel, type `/gfv ranks status` and pick **yourself** as the pilot.
2. The bot replies privately with:
 - your current membership role,
 - your recognition rank (or *none yet*),
 - **Membership started**: the date and how many days ago, and
 - **Time-based eligibility**: Pioneer, Vanguard, or *not yet* (*Pioneer at 30 days*).

How Recognition Works

Rank	When	How
Pioneer	30 days in good standing	Awarded by leadership after a good-standing conversation
Vanguard	90 days as a trusted regular	Awarded by the CEO

Being eligible does not award a rank automatically. Leadership reaches out; you do not need to ask, though you are always welcome to.

Things That Happen on Their Own

- After about a week as a New Member or GFVX member, the onboarding channels in START HERE (#rules-and-code, #how-to-join, #new-pilot-onboarding) hide themselves to keep your channel list tidy. Ping roles live in #pilot-resources (SOP-M10).
- If you go quiet for about 30 days, an officer may check in with you. It is a friendly check-in, never discipline, and the bot never removes anyone.

What success looks like

You know your role, your membership date, and when recognition comes up, and you know nothing happens behind your back.

If Something Goes Wrong

What you see	What to do
<i>You may view only your own membership status.</i>	Pick yourself as the pilot. Leaders can check others.
Your start date looks wrong	Start dates were first recorded on 2026-09-25. Tell an officer if yours is off.

Need Help?

Ask in **#help-desk**, or message the CEO.
