

STANDARD OPERATING PROCEDURE · SOP-M06 · GFVX

Using the Doctrine Library

Find a GFVX fit, copy it into EVE, and buy what you need

Applies to	Every GFVX pilot
Where	galacticfrontierventures.com/doctrine and the EVE Fitting window
Time needed	About 2 minutes per fit
You need	EVE running, and ISK for the hull and modules

What This Is For

The Doctrine Library holds ready-to-copy GFVX fits for four paths: **Frontier Line**, **Mission Ladder**, **Exploration**, and **Veteran T2**. Every fit is in EFT text format, which EVE can import directly, so you never have to build a fit module by module.

Flying for SRP?

The library fits are reference fits. For ship replacement (SRP), fly the corporation fitting published by leadership for that fleet, and follow the fleet commander's instructions.

Step 1: Find a Fit

1. Go to galacticfrontierventures.com/doctrine.
2. Pick a path tab: **All**, **Frontier Line**, **Mission Ladder**, **Exploration**, or **Veteran T2**. Each tab shows a short note on when to fly it.
3. Or type in **Find a hull, role, or activity** (for example *tackle*, *Omen*, or *gas*).

Each card shows the path, whether it works on an **Alpha** or **Omega** clone, the hull, its role, and a short note.

Step 2: Copy the Fit

1. Click **Review EFT fitting** if you want to see every module first.
2. Click **Copy EFT fit**. A message confirms it was copied.

If your browser blocks copying, open **Review EFT fitting**, select the whole text, and copy it yourself (Ctrl+C).

Step 3: Import It Into EVE

1. In EVE, open the **Fitting** window, then open your **saved fittings** (Fitting Management).
2. Choose **Import from Clipboard**.
3. The fit appears in your saved fittings with its name.

Step 4: Buy and Fit the Ship

1. Get the hull: from the home market in Zhiishinou, GFVX stock, or the Amarr market.
2. With the hull active, open the saved fit and use EVE's option to **buy the missing items**, then **fit the ship**.
3. Check that every module is online and that the fit shows no warnings.

What success looks like

The fit is saved in EVE under its GFVX name, your ship matches it module for module, and nothing is offline.

If Something Goes Wrong

What you see	What to do
<i>Your browser blocked clipboard access</i>	Open Review EFT fitting , select the text, and copy it manually.
EVE says it cannot import the fit	Copy the whole fit, including the first line in square brackets, and import again.
You cannot fit a module	You are missing a skill. Check the module in EVE to see which skill, or use the full guide's skill plans.
No fit matches your search	Try a broader word, or open the full guide for alternate hulls.

Good to Know

- **Open full guide** opens the complete doctrine guide (PDF) with alternates, every mission step, skill plans, T2 requirements, and the SRP rules.

- **Check markets in EVA** opens EVA Industry's market search to compare prices (see SOP-M07).
- Doctrines change as the corp grows. Re-copy a fit if leadership announces an update.

Need Help?

Ask in **#help-desk** or **#general**. Fleet commanders and officers are happy to check a fit before you undock.
